

The DC0002 Portable Communicator

DC0002 Diving Comms

The DC0002 is a portable communication unit. It has been especially designed for diving purposes.

The unit provides communication between a tender and 2 divers. Cross-talk between the divers is possible. The unit has an output to which a recording device can be connected.

The unit has a compact, rigid housing. It is provided with a belt clip.

The DC0002 is also available in a rechargeable version (DC0002R). The rechargeable version comes with rechargeable battery pack, battery charger, headset and a shoulder strap.

The battery life exceeds 30 hours (standby). The unit has an indicator for low battery voltage. (< 7.5V)

The diver inputs are protected against overload, the outputs are protected against short-circuits.

Specifications
