

Hytech 3205 HBO Communication System

Communication system for Hyperbaric Treatment Chambers

The control panel unit

Features:

- Selection between four different communication modes:
 - MC: communication between control panel and main chamber
 - EL: communication between control panel and entrance lock
 - 1-32: Individual communication between the operator and one specific patient. The communication set can be used with up to 32 patient seats
 - All: Communication between operator, both chamber compartments and all patient headsets.
- Inputs for five entertainment audio channels. Each patient can individually select the channel he or she prefers, and listen to it through his/her headset.
- Built-in patient call system. The patients can press a call button, which will send a signal to the operator requesting a private conversation.
- Connector for external headphone and microphone
- Optional: dimmer control for individual patient lights

The Patient control panel inside the hyperbaric chamber.
