

**KIRBY MORGAN M-48 SUPER MASK**

*The M-48 (Black)*

The Kirby Morgan SuperMask M-48 is a lightweight modular full face mask that allows for easy and rapid adaptation to various self contained underwater breathing apparatuses as well as surface supplied systems.

The mask frame and rigid components are made of high impact plastic. The face seal is made of the highest quality silicone that conforms to the diver's face. The removable lower pod is a feature unique to the M-48 full-face mask. When diving, the pod is easily removed and replaced on the mask, providing the diver the capability to buddy-breathe, use a snorkel, use an octopus or perform an "in-water" gas switch.

With the pod sealed to the mask, the flexible silicone pod cover allows the diver to quickly place the regulator in the mouth, or dive with it free of the mouth for communications. With the mouthpiece in, the regulator may be used without the pod being sealed to the mask.

The mask may also be used surface-supplied. Several different pod configurations are available, both for open circuit and rebreather use.

*To use comms, it is possible to dive with the mouthpiece out*

*Removable regulator makes using an alternative air source possible*

**800-048 SuperMask w/o regulator**

**800-050 SuperMask w/SuperFlow® adjustable second stage regulator**

**805-015 Scuba Pod**

*Removable mouthpod*
