

The Hytech Transportable Video System consists of an Explosion-proof camera, cable reel and a case with a HDD/DVD recorder and a 17" TFT - LCD screen. The system can be used as an addition to an existing life support system without a video surveillance system.

Specifications:

Power Supply: 230V, 50-60 Hz
Dimensions: L635 x W483 x H391 mm
Weight: Case ± 27 kg, Reel ± 8 kg

Camera:

Image Sensor: 1/3" CCD, 798x548 pixels
View Angle: 90° hor, 68° vert
Temp. Range: -30 / +70°C
Weight: 435 grams (without cable)

The HDD/DVD recorder can record many hours of video on the hard disk. The video recordings can be written to a DVD that can be played back on most DVD players. It is also possible to record directly to DVD. The recorder supports both single layer and dual layer DVD+R disks.
